To Whom It May Concern:

I am writing about the conference I attended recently in Wahpeton, North Dakota. I just had to write and say that it is by far the best seminar I have ever attended. Linda was so passionate about getting all of her information across and at the same time the day flew by and we truly had a FUN time. This is designed for all professionals, whether they are doctors, nurses, social workers or really for anyone. The information was clear, concise and all my questions were answered. Working in an OB-GYN department made me aware of how little information we have available for our moms who are choosing this life for their child. And I had no idea how much these things had all changed. You see, 30 years ago we adopted our daughter from Korea and then 3 years later, our son. It made me excited as within the next 2 weeks of having attended the seminar I got to use a few of the skills I learned there. We are planning on hosting a seminar after the first of the year at our hospital and I know my department is excited. Thank you Linda, for your passion for this wonderful cause. You made the day great!

Sincerely,

Joan Borgen
